

ACRYGLOSS®

THE ULTIMATE HIGH GLOSS FINISH

Cleaning and Care Instructions

Protective Film: The surface of Acrygloss® is covered with a PE protective film; we recommend leaving this on the doors up till after installation is completed. After removal of the film, the surface is ready for daily use.

Cleaning:

Vuplex: Removes static on surface, making fingerprints and other marks to be wiped off easily. Vuplex should only be used from time to time to avoid a residue build-up on the surface (causing streaks).

Other: For regular cleaning, simply use a damp microfiber cloth (with a bit of soap as required). Dry with a soft towel for best results.

Avoid: Spraying cleaners directly onto the surface of the doors as this can cause water to pool on the bottom of the door.

Avoid: Although Acrygloss® is scratch resistant, the use of scouring agents, abrasive cleaners and harsh chemicals can cause damage and should be avoided.

Backing material: The backing material on our Acrygloss® White, Black & Glacier does not have the same scratch resistance grade as the face material. As it is not as scratch resistant, care should be taken after the protective film is removed to allow time for the surface to harden (approx 24-48hrs). For best results, we recommend not cleaning/wiping the surface during this time.

Warranty

The Consumer Guarantees Act applies to Acrygloss® doors by Sage Doors Ltd. All Acrygloss® doors and panels come with a 10 year guarantee to the original purchaser against all defects in the materials.

The Acrygloss panel surface is waterproof. However, while the Invisedge® is 97% water proof, we cannot guarantee that is *water resistant*. Care should be taken to ensure edges (especially those that are unclashed) are not exposed to continuous or excessive steam and water. Water should be wiped up to avoid swelling.

Please Note: The guarantee will not apply in cases where the product has been damaged after manufacture through misuse, negligent cleaning, water damage, or maintenance.

Liability will be limited to replacement of the doors and panels. Sage Doors Ltd will not meet any costs of refitting or installation. Under no circumstances will liability exceed the current purchase price of the original goods.
