

Material Options

Raw HDF (pocketed profiles where frame is greater than 50mm will also have 2.5 mm deep pocket on the back to reduce tension.)

HDF 1F with white satin melamine on the back. (no need to paint the back of your doors. This option can result in bowed doors.)

HDF 2F with white satin melamine on both faces. (this option is for non pocketed doors where you only want to paint the face.)

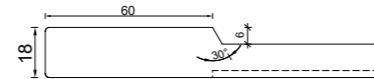

Thicknesses available 12,18,21,22,30mm. Some thicknesses are not suitable for some profiles. Please ask if the combination you want is not visible on the website

Select the Door profile by choosing the material. **Door profiles with Bold blue text available in the Opticoat range**

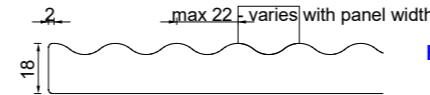

Select the Edge profile in the box which pops up. (R1.5 and aris are the most popular)

Select edges to be profiled by marking as edged.
